Ascend Intelligences LLC

Financial management · IT governance · Project management · Digital transformation and AI

Capability Statement

September 2026 · ascendintelligences.com

Core competencies

- **Internal control and audit readiness.** OMB Circular A-123 programs (2026 revision), FMFIA assurance, internal control over financial reporting and financial systems, FISMA and NIST 800-53 alignment, remediation of audit findings.
- **Financial management modernization.** ERP design and migration (Oracle Financials, Microsoft Dynamics 365), legacy consolidation, financial reporting, accrual and IPSAS transitions, public financial management reform.
- **IT governance and capital planning.** Governance frameworks linking policy, enterprise architecture review and portfolio management; IT demand management; capital planning under OMB Circulars A-11 and A-130; ServiceNow strategic portfolio management.
- **Project and program management.** Charters, plans and schedules, requirements traceability, acceptance testing, PMO set-up, executive reporting; project appraisal and scoring models for boards and investment committees.
- **AI for finance and audit.** Retrieval-augmented generation platforms on institutional knowledge; agentic AI use cases and implementation briefs with the controls to match; Power BI analytics.
- **Digital finance governance, West Africa.** Data governance reference frameworks, NIST-aligned cybersecurity assessments and risk-based supervisory instruments for regulators and financial institutions in the WAEMU region; capacity building in French.

Past performance

- **U.S. Marine Corps.** Program lead, internal control over financial systems under OMB A-123: team of ten; service-provider control assessments, IT general and application control mapping, deficiency remediation, NFR analysis.
- **U.S. Department of the Treasury (TEOAF).** Project lead for the migration of seven legacy financial systems to Oracle Financials; policies and procedures; real-time financial reporting and audit compliance.
- **DoD Office of Inspector General.** IT governance framework (policy, Enterprise Architecture Review Board, portfolio management) and an AI retrieval platform serving about 2,000 users in more than 60 locations; IT capital planning support.
- **FEMA (with IBM).** Deputy project manager, financial systems modernization: project plans, work order management, financial systems strategy, business cases.
- **DoD and Office of Naval Research (with Booz Allen Hamilton).** Cloud migration, application rationalization, consolidation of Department of the Navy financial management systems.
- **Department of Justice, Office of Justice Programs.** Online reconciliation tool that cut the reconciliation cycle from four business days to one; grants management support.
- **U.S. Air Force and U.S. Army.** FIAR audit readiness: MILSTRIP assertion, process narratives and control design (Air Force); existence and completeness assertions, standard operating procedures, property controls (Army).
- **NIH and DHS (ICE).** Budget system design and financial forecasting modernization (NIH); shared financial services, journal voucher repository and audit readiness (ICE).
- **FONGAD Invest (diaspora investment fund).** Director of projects and board member since 2021; designed the project appraisal model and weighted scoring used for board decisions.

Differentiators

- Eighteen years inside federal financial management, on the agency side and the contractor side, including a program lead role under A-123.
- Serves U.S. federal agencies and African multilateral and government clients with the same depth, in both languages.
- Bilingual French and English, with an operating company in Dakar and working relationships across Senegal's financial and institutional actors.
- Builds the tools it recommends: the A-123 Assurance Kit (FY2026), the Senegal parapublic internal control kit, Kotiza (a digital registry used in Senegal and the diaspora).
- All costs charged direct; no indirect rate. Prepared for pre-award financial capability review.
